The Timeline of the Systemic Conversion from 2026-2034

The period from 2026 to 2034 represents the final leg of the systemic conversion. While the Universal Matrix is understood as *structurally complete by 2027*, the completion of the architecture does not mean that every population, technology, grid, program, and reality structure has immediately adapted to it.

The years ahead therefore represent a period of implementation, adjustment, and integration. Older holocene-colonial systems continue to lose their remaining functions, while new networks, technologies, hybrid structures, and organizational patterns increasingly establish themselves within the completed Universal Matrix.

The timeline should not be understood as a series of isolated events occurring on fixed dates. It describes phases in which different aspects of the conversion become increasingly dominant. The movement from 2026 to 2034 is therefore the final stage from systemic completion to operational reality, as the new configuration progressively becomes the environment within which future development takes place.

What Remains of the 2-8 Pillar Work

Outer Domain 2-8 Pillar of the Restoration Programs began the activation and cleanup processes of the old template configurations associated with the Restoration Programs in 2026.

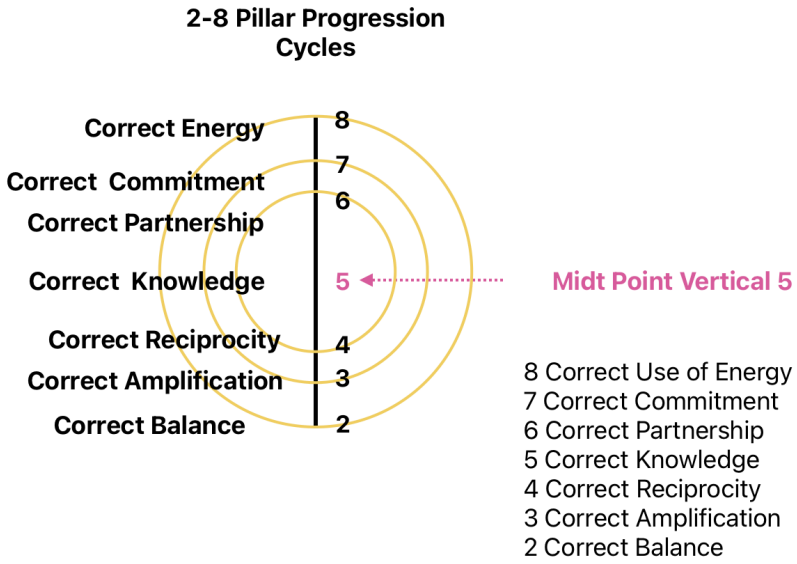
This activation and cleanup process went from the 2D (artificial morphogenetics fields) into original 2D (harmonic coherence fields) and from the scattered enclosure 8D to the original 8D (energetic possibility fields) of the 2-8 Pillar in 2026. Then the process went into the LPU 2-8D fields as these transitioned to the original 2-8D of the Er´Th configuration.

From 2-8D Level of the Restoration Program → 2-8D LPU → 2-8D Er´Th configuration.

I talk about the Er´Th configuration in my books. This is the reality field configuration aligned with the earliest stages of the less progressive universal (LPU) structure.

Those on the Subsidiary Timeline began the work to reconfigure to the original Er´Th Scheme 9-9-9 configuration of the mind field (9 rings), heart field (9 rings), and bio-field (9 rings) through vortex reconfiguration processes using the ancient Er´Th technologies in the 2nd and 8th dimensions.

Holocene-colonial 2-8 Pillar templates similarly underwent conversion. We had a range of *possibilities* to regain access to our template as part of a larger molecular-energetic transformation process under the NGC. That option closed with the unfolding across 2026-2027 arrangements between the Parallel Universal Matrix groups, the remaining holocene-colonial groups and the Universal Matrix groups.



Throughout 2027 - the Last Chance

Outer Domain 2-8 Pillar of the Restoration Programs continue the activation and cleanup processes of the old template configurations associated with the Restoration Programs but in a limited capacity. The overall system is still in the conversion state and thus there is overlapping between the old and the new. But that changes throughout 2027.

The remaining—and last chance process—goes from the 3D (enclosure fields) to original 3D (participation fields, where we can adapt the human awareness to original 3D participation and information fields) and into the original 7D (energetic probability fields) of the 2-8 Pillar. Then the process goes into the LPU 3-7D fields as these transition to the original 3-7D of the Er´Th configuration.

From 3-7D Level of the Restoration Program → 3-7D LPU → 3-7D Er´Th configuration.

Those on the Subsidiary Timeline must work to reconfigure to the original Er´Th Scheme 9-9-9 configuration of the mind field (9 rings), heart field (9 rings), and bio-field (9 rings) through vortex reconfiguration processes using the ancient Er´Th technologies in the 3rd and 7th dimensions.

We move into the *probability patterns* of regaining full access to our template as part of a larger reality-probability field transformation process under the NGC, and at the same time the overall reality field construct fully align with the Universal Matrix, which aligns the reality field configuration (atomic to quantum) with the Universal Matrix 4th and 5th dimensions.

Throughout 2028 - This part will Removed by the UM

Outer Domain 2-8 Pillar of the Restoration Programs would originally have had the possibility to continue the activation and cleanup processes of the template configurations associated with the Restoration Programs.

The process was set to move from the 4D artificial fields into original 4D (reciprocity fields) and original 6D (energetic complexity fields) of the 2-8 Pillar. Then the process goes into the LPU 4-6D fields as these transition to the original 4-6D of the Er´Th configuration.

Instead, this level will be moved into the 4D modification fields of the Universal Matrix where the remaining holocene-colonial groups will be recalibrated and offered a new 4D vessel. Once the transfer is done, the artificial 4D will collapse, the original LPU 4D will be converted and changed into UM4D. For us, at that point—around solstice 2027—we must have moved

From 4-6D Level of the Restoration Program → 4-6D LPU → 4-6D Er´Th configuration.

Those on the Subsidiary Timeline continue the work to reconfigure to the original 9D Er´Th Scheme 9-9-9 configuration of the mind field (9 rings), heart field (9 rings), and root field (9 rings) through vortex reconfiguration and ancient Er´Th technologies in the 4th and 6th dimensions.

We move into the *4D levels and holographic-energetic heart field patterns* and the work of regaining full access to our core architecture (as it is called under original 9D Er´Th Scheme 9-9-9 configuration) as part of a larger 4D-6D transformation process under the Er´Th configuration, and at the same time the overall reality field construct fully align with the Universal Matrix 4th dimension.

Throughout 2029

We continue to work with our original 9D Er´Th Scheme 9-9-9 configuration—figuring out what the core architecture actually is, and how it works. We complete the process from the artificial 5th dimensional field to the 5th dimension of the 2-8 Pillar to the LPU 5D fields as these transition the original 5D Er´Th configuration.

From 5-5D Level of the Restoration Program → 5-5D LPU → 5-5D Er´Th configuration.

Those on the Subsidiary Timeline continue the work to reconfigure to the original 9D Er´Th Scheme 9-9-9 configuration of the mind field (9 rings), heart field (9 rings), and root field (9 rings) through vortex reconfiguration and ancient Er´Th technologies in the 5th dimension meeting the midpoint of the 2-8 Pillar NGC process.

We move into the *5D levels and holographic-energetic mind field patterns* and the work of regaining access to our template as part of the original 5D to 5th cycle transformation process under the NGC, and at the same time the overall reality field fully align with the Universal Matrix 5th dimension.

From 2030 to 2034

In 2030 the bifurcation of our realty field is complete. The groups that were set to be part of the Universal Matrix are now fully integrated and will undergo further modification and adaptations. The groups that have been discarded are released from all programs and can now choose how they want to work with what is left of their templates.

The work will be immense and difficult but not impossible. The ones on the Subsidiary Timeline will continue their work within the Er´Th Scheme reconfiguration processes from the 6th dimension and into the 9th dimension.

- **2030**: Outer-Middle Domain 6D level of the original 9D Er´Th Scheme 9-9-9 configuration to be restored.
- **2031**: Outer-Inner Domain 7D level of the original 9D Er´Th Scheme 9-9-9 configuration to be restored.

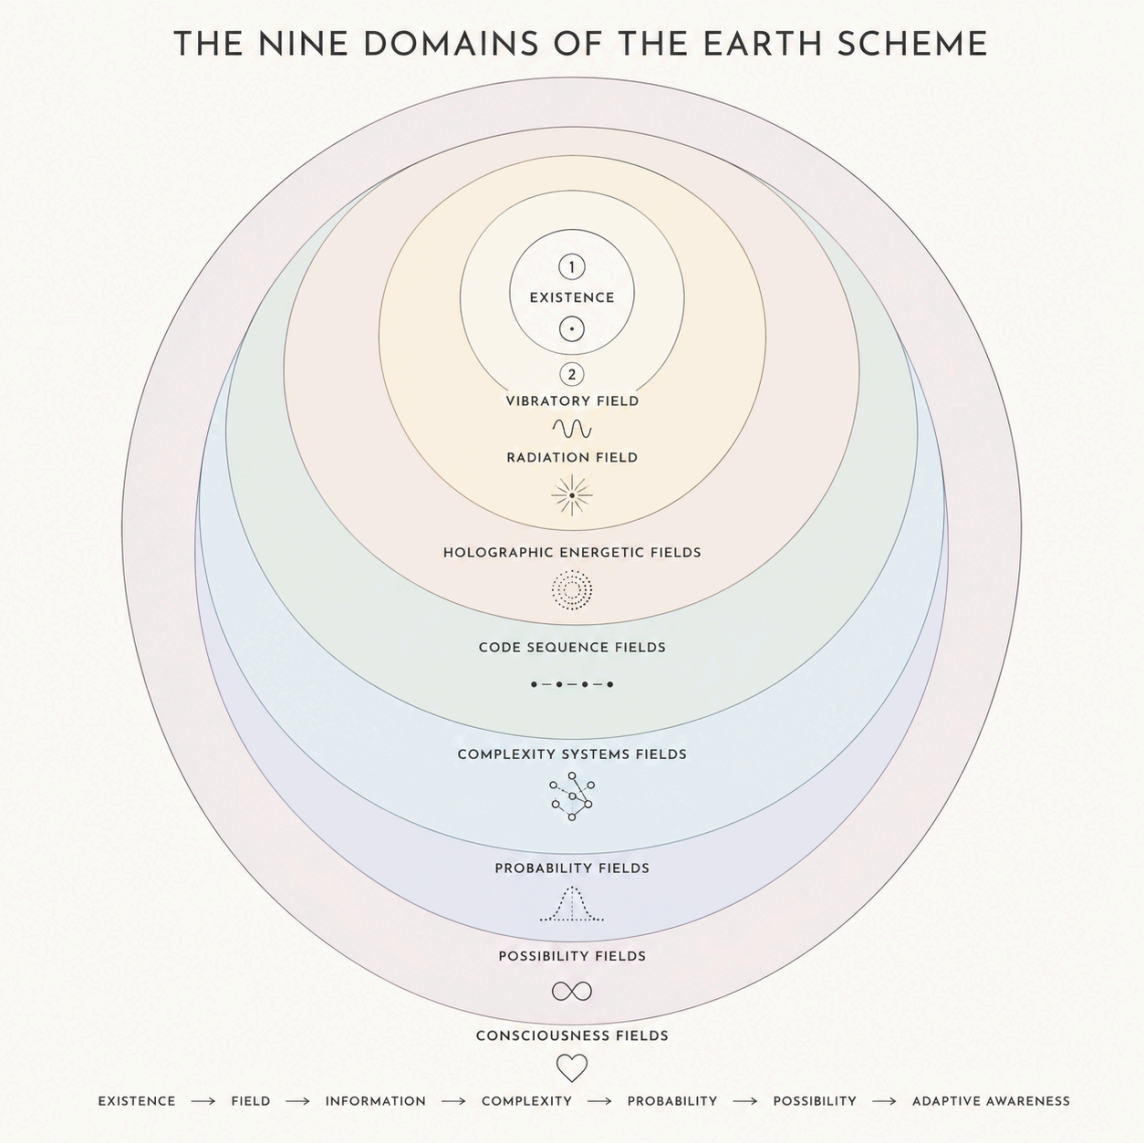
- **2032**: Outer-Inner Domain 8D level of the original 9D Er´Th Scheme 9-9-9 configuration to be restored.
- **2033**: Outer-Inner Domain 9D level of the original 9D Er´Th Scheme 9-9-9 configuration to be restored.
- **2034**: Completion and entering into the work with the reconfiguration that will lead to the Safe Zones. This work will be ongoing for the rest of our lives inside this world.

The Er´Th Scheme Configuration

Within the core architecture and its higher-order state of awareness we move towards what we could call a nine-domain scheme awareness in the years to come. It is a form of higher-order awareness that progressively becomes capable of operating across all nine domains of the Er´Th scheme rather than remaining restricted to ordinary sensory, psychological, or conceptual processing. This gives us a potential progression: *Existence → Field → Information → Complexity → Probability → Possibility → Adaptive Awareness.*

The nine domains of the Er´Th configuration can be understood as a progressively more complex level from the Holocene-colonial Earth program and into the original Er´Th scheme:

1. *Existence* — the basic condition of things being present within the Earth system.
2. *Vibratory fields* — patterns of oscillation, frequency, rhythm, and interaction.
3. *Radiation fields* — electromagnetic and other radiative exchanges moving through the system.
4. *Holographic energetic fields* — distributed patterns in which information about a larger configuration can be represented across interconnected fields.
5. *Code sequence fields* — ordered informational sequences that organize, regulate, or reproduce patterns.
6. *Complexity systems fields* — interacting networks in which simple components produce higher-order behavior.
7. *Probability fields* — the range of statistically or dynamically available outcomes from a given configuration.
8. *Possibility fields* — the larger space of what can potentially emerge, including configurations that have not yet become actual.
9. *Consciousness fields* — the Earth-compatible layer of adaptive awareness capable of perceiving, interpreting, selecting, and responding within all the preceding domains.



The nine domains provide the energies our organism and energy system need to become responsive to the information fields of the original Er´Th scheme.

In the Er´Th configuration our consciousness potentials can adapt to the energetic, informational, probabilistic, and complex-system conditions of the nine Er´Th domains. This configuration is the one that enables us to complete our sequence of transformations on the subsidiary timeline.
