
Transmission 2 - The Correction of the 8th Dimension of Our Reality Field

The energetic landscape between this current full moon (end May 2026) and the upcoming solstice (June 2026) marks an acceleration phase—a quickening of the reality field as it calibrates toward a highly anticipated solstice portal.

This is not just a routine seasonal shift; it represents a major cosmic relocation. Our local reality field configuration is being systematically uncoupled from its previous settings and reengineered into an entirely new configuration that allows for reconnecting to a less fragmented sector of the solar system grid. As a result of this energetic transition, the settings of our reality field holographic-energetic features are changing.

The Departure of the Old Guard

For millennia, certain entities and entrenched energetic NHI factions have had what they call stewardship of our system. These groups have changed over the Holocene.

The last time it changed was in 2016-2022 which signified an end to the longest occupation by the Sirian A collaborators with the D10 collective along with ancient Orion-Atlantean groups collaborating with the Sirian B, the Niburians and diverse groups of Nordics. In many cases, these groups unfolded, and still do—along with the incoming from the future NHI—what we would interpret as dominant control over the human reality field.

Here dominant control is to be understood as “do it their way or else”..... These ways are not, and have not been, in alignment with our solar system original configuration and thus have depleted it of vital holographic-energetic units upholding the reality grid formation.

As the incoming 2-8 dimensional frequency patterns change over 2026-2034, following the New Grand Cycle activation and cleanup cycles, our sector will become inhospitable to the legacy groups, and thus waves of leaving has happened over the last 9 years and will continue until at least end 2027. Their prerogatives, as it is called, have expired and because of this, their vibratory signatures no longer match the unfolding grid formation and holographic-energetic calibration. Thus, they are systematically leaving and will phase out of this reality theater.

The Terrestrial Orions from the Future on the 2-8 Pillar Evolutionary Path

Stepping into this newly vacated vacuum is a highly advanced collective. Though they may seem entirely alien to our current level of perception, they are terrestrial in origin—deeply tied to the evolutionary arc of this sector, although operating from a timeline and a density profile roughly 10,000 years ahead of our current reality field.

In appearance, their form is reminiscent of the "Tall Gray" archetype often documented in UFO communities—elongated, elegant, and highly cerebral. However, their nature is far from the clinical, detached abductors of 20th-century UFO encounters. They are highly evolved, integrated beings who have mastered the mechanics of time, consciousness, and physical manifestation. And they are drawn to our reality field due to the New Grand Cycle recalibration dynamics, as explained in [the 2-8 Pillar Work & the NGC Course Material](#).

The Solstice Portal and "The Plans"

The acceleration of energy from now and until solstice is essentially a holographic-energetic data transfer and stabilization process of the old 8th dimensional layers of our Earth system (of which there are 9 dimensions), preparing the humans for a potential direct, albeit subtle, interaction with these incoming NHIs. They are not here by accident; they have definitive plans for our reality field, as our sector due to reality sectorial dynamics are being interlinked, and with that bridge to their reality field configuration.

- *Timeline Anchoring:* Because they exist 10,000 years ahead, their presence acts as a massive evolutionary anchor, pulling our current chaotic timeline toward a different configuration that we have not had during the D10 collective oversight. This means advanced future-state possibilities of inventions, technology and consciousness progression.
- *Grid Upgrades:* They are actively retrofitting the planet's energetic architecture to support higher cognitive functions and telepathic resonance with selected groups.
- *Reality Restructuring:* Their blueprints involve a systematic dismantling of old, density-based control systems to make room for a collaborative, multidimensional and multi-temporal accessibility and communications-transfer bridges.

We are walking through the threshold. The volatility, change in dreamscaping technologies and interception technologies, and sense of energetic dilation, or the opposite, will be the consequences. Many are feeling this right now as the symptoms of our reality field being amped up. As the old groups pack up and the new terrestrial vanguard settles into the new sector, humanity will be fast-tracked into a different epoch of evolution for those who want to join that scheme. *For the rest of us, still on [the Subsidiary Timeline \(ST\)](#), we must engage more thoroughly with the dynamics of the ST and the holographic-energetic interactive teaching system to enable the vibrational state needed to remain connected to the transition dynamics of the true path.*

The Uplifting Process

The process that unfolds over the next 3 weeks (May-June 2026) is not tied to spacetime and our current reality field dynamics. *It follows the schematic reconfiguration processes of the original worlds.* This means that the recalibration of our reality field will only impact those holding the configuration for this form of advanced civilizational blueprint.

For most within the Lunar-Earth scheme, this implies little to no infliction of their organic vessel and internal structure since the majority of these groups do not hold a template. For the original civilizational blueprints (template) this means an option for a recalibration of their 2-8 pillar organization, if they do choose to align with the new bridge energies from the Orion system.

In the eyes of the incoming NHI and their affiliated groups, they present this as an opportunity. For me, it appears as another holo-overlay to our reality field.

However, we cannot overlook the fact, that whilst we underwent the New Grand Cycle (NGC) activation and cleanup process of the 3-9 pillar (2017-2025), this process was backed by another systemic intervention, or recalibration process, instigated by the 9D Andromedan technologies and the now-gone remaining groups before their system fully recalibrated the 3-9 pillar configuration of their own system and in that, disconnected entirely from our 3-9 pillar configuration.

All that is left from this Andromedan intervention is the ST, enabling us to complete the NGC work, since the ST is now being upheld by inner Earth (original 3-9 configuration) technology and what is left in the Andromedan system of technologies supporting our processes. However, the 8D Orion galactic configuration is not of the same caliber.

First we must understand that our own 2-8 pillar configuration is so damaged that it cannot complete the NGC processes, and in accordance with *the ancient laws of energetic and genetic affinity between systems* (if a system overlaps with another system in a similar vibratory process, and meet the same processual evolutionary dynamics, the two or more systems must interconnect and assist each other for the highest good of the many) the Orion 2-8 pillar is consequently being connected to us.

This became possible as the core alignment between our galaxy and the dark galactic core of the Orion system happened in 2017. It was not just about pulling us closer to the Void, it was also about this moment where the remaining parts of the pillar project—following the 2-8 pillar activation and cleanup cycle as it unfolds over the next 9 years—would enable the Orion system to reconnect to us. If that had not happened, our system, over the next 9 years, would

reconnect to the ancient highly distorted and disrupted levels of the outworn systemic reality grids, housing clouds of dispatched genetics fragments (often referred to as the Underworld of the ancient days).

This would mean a flow-in of ancient energetic and genetic sectors that have long been segregated from our worlds, for a very good reason using ancient technology to segregate this into a lower-dimensional band aka the Underworld. The fragmentation and disruption of these grids, networks and lineages stuck on these timelines are so damaged that they pose a danger to us. Subsequently, there are no optimal solutions. Either a sub-terrestrial reconnection or an otherworldly connection to a lesser damaged system, similarly going through their version of the completion cycles, as they unfold over the entirety of this sector.

The Mechanics

The mechanics of the bridges and their infusion points are not temporal but based upon momentum and calibration thresholds. The recalibration is top-down from the Orion 8th dimension into our sectorial 8th dimensional Earth configuration band following the radiation code configurations of the Inner Domains (D7-9D). Consequently, this is also happening on a systemic level, and on a galactic level. From their core to our galactic core, to the solar core and then to the planetary cores in our solar system. This will change the configuration of all core systems in our sector. Moving away from the Andromedan infusion bridges and into the Orion infusion bridges.

Once the sectorial calibration is in place, the templates that are similar in Orion Inner Domain (ID7-9) configuration will begin their activation and cleanup processes. This template configuration is not the original solar system template configuration *but the later inserted genetic hybrid templates, mostly engineered under the Atlantean ancient prerogatives and the groups still operating under these ("Orion starseeds")*. They will come into play now with their information and contextual information systems adapted to seed in the new collective thoughtforms allowing this group to integrate and modify larger portions of the collective grid to their purpose of activation.

The remaining true human groups will continue their ST path and the reconfiguration process. The Orion group activation will be held within a certain area of the population and their internal structure, and how they unfold this into the collective, will be less visible now as this collective activation and insertion process is set to unfold in conjunction with [the terraforming of the planetary schematics](#). The impact of this will become visible in the next human generation after the 100 solar cycle is over. **End of Transmission 2.**
